🐙 [github.com/SyedUzair-SF](https://github.com/SyedUzair-SF)

Data Analyst with project-based experience analyzing 60k–100k+ records using SQL, Python, and Power BI to support pricing, revenue, and customer decisions. Strong in turning raw data into clear business insights through dashboards and analysis.

## KEY PROJECTS (INDEPENDENT ANALYTICS PROJECTS)

### Regional Sales Performance & Profitability Analysis

- Analyzed 64,000+ sales transactions across 5 years to evaluate regional, product, and channel performance.
- Identified SKU, customer, and geographic concentration risks impacting revenue stability and profitability.
- Revealed pricing as the primary profit driver (strong correlation with revenue and margin), outperforming volume effects.
- Built interactive Power BI dashboards to support pricing, channel, and regional investment decisions.

Tools: SQL (PostgreSQL), Python (Pandas), Power BI

### Customer Shopping Behavior & Segmentation Analysis

- Analyzed 3,900 customer transactions using SQL and Python to identify spending patterns and purchase behavior.
- Segmented customers into New, Returning, and Loyal groups, revealing repeat buyers as the primary revenue drivers.
- Found express shipping users and subscribers had higher average purchase values, informing pricing and promotion strategy.
- Built an interactive Power BI dashboard to track customer segments, revenue drivers, and purchasing trends.

Tools: SQL (PostgreSQL), Python (Pandas), Power BI

## PROFESSIONAL EXPERIENCE

### Data Analyst – Analytics Projects (Project-Based Internship)

10/2025 – 12/2025 | Hyderabad

Full Stack Academy

- Analyzed large structured datasets (50k–200k rows) using SQL and Python to support sales and customer analysis
- Built complex SQL queries (CTEs, joins, aggregations) to answer revenue, growth, and customer retention questions
- Cleaned and validated raw data, reducing inconsistencies and missing values by ~30%
- Developed interactive Power BI dashboards tracking KPIs such as revenue, regional performance, and customer behavior
- Automated recurring Excel and SQL reports, reducing manual reporting effort by ~40%

## TECHNICAL SKILLS

### Programming & Tools:

- Python (Pandas, NumPy)
- SQL (PostgreSQL, CTEs, joins, aggregations)
- Power BI (DAX, dashboards, data modeling)
- Excel (Pivot Tables, XLOOKUP, reporting automation)
- Git, Jupyter Notebook

### Analytics & Concepts:

- Data Cleaning & Validation
- Exploratory Data Analysis (EDA)
- KPI & Revenue Analysis
- Dashboarding & Insight Communication
- Ad-hoc Business Reporting

## EDUCATION

### Bachelor of Engineering in Computer Science (Data Science)

2020 – 2024 | Hyderabad, Telangana, India

Osmania University

## CERTIFICATIONS & ADDITIONAL INFORMATION

- Google Advanced Data Analytics Professional Certificate – Google (2024)
